Pica+ → [MARC 21](#) for transferring titles to WorldCat:

- titles with OCLC institution symbols in 949 \$I
- MARC 21-fields according to OCLC conventions
- matching of 10.000.000 title records from SWB in WorldCat (March 2009)
- next step: transfer of SWB-titles using SRU

---

Pica+ → [MARC 21](#) for transferring titles, holdings and authority records to ILS and other union catalogues in Germany

- separate records for titles, holdings and authority data
- \$w, \$0 for links between records
- using most of the changes for the German and Austrian conversion to MARC 21 (Marbi proposal 2007-6)
- using MARC 880 Alternate Graphic Representation
- using 9xx-fields or xx9-fields or \$9 for locally defined elements
- no ISBD interpunction at the end of subfields

Two different conversion tables for MARC 21 are required!

- one for WorldCat
  - with ISBD interpunction at the end of subfields,
  - without \$0, \$w
  - without 9xx-fields, xx9-fields, \$9 for locally defined elements
- one for ILS and other union catalogues

**Who owns the past? the politics of time in a "model" Bulgarian village**  
Kaneff, Deema (DE-576)267667590

In this study of politics and the past in contemporary Bulgaria, the author examines the complicated ways in which ideologies of the past are used to make claims to power and resources in the present, and are transformed under different political regimes. Drawing on more than a decade of research read more...

- Holdings data: the handling is different in each system
  - VuFind-import cannot handle separate title and holdings records (no linking)
  - Koha-import uses a concordance which converted local data to field 952 with different subfields

Possible solutions:

→ create another conversion table with fields 841 to 878 integrated in the title record?

→ create a separate script for integration of a choice of holdings record fields in the title record (not usable for complex holdings informations)?

- ISBD interpunction at the end of subfields
  - missing interpunction in the data file needs more configuration in the opac view of Koha and Symphony
  - next step: look at the configuration
- Record control numbers in \$0 and \$w
  - Koha is able to deal with the record control numbers and create links between the records
- Alternate graphic representation (field 880)
  - the opac view of Koha needs some more configuration to display the vernacular script

## MARC 21 → Pica+

- batch import of LOC data
- batch import of data from D.K.Agency New Delhi
- Z39.50-connection with the cataloguing client to
  - LOC
  - WorldCat
  - Nebis (Switzerland)

Next step: batch import of data from German National Library

→ integrate the „changes for the German and Austrian conversion to MARC21“ and the fields for locally defined elements

The logo for the Bibliotheksservice Zentrum Baden-Württemberg (BSZ) is located in the top left corner. It consists of the letters 'BSZ' in a bold, black, sans-serif font. To the right of 'BSZ' is the full name 'Bibliotheksservice Zentrum Baden-Württemberg' in a smaller, black, sans-serif font. The logo is framed by a green horizontal line above and a blue horizontal line below. A vertical red line runs down the left side of the slide, and a vertical yellow line is positioned to the right of the 'BSZ' text.
